

## How to make a Recycled Milk Carton Bird Feeder

Step 1: Take empty milk carton and cut out 2 square openings on two sides opposite of each other.

Step 2: Decorate your bird feeder (if you want!)

Step 3: Take a hole punch to make a hole below each opening. Place a stick to make a perch for the birds

Step 4: Use a box cutter, scissors, or hole punch on the top of the milk carton to run yarn or string through to hang it

Step 5: Pour bird seed in the bottom

Step 6: Watch for the birds!
